Studio 2021.10.7
Community License
Per-user installation

UiPath Studio Community

Open

**Open a Local Project**
Navigate and open an existing project

**Clone or Check Out**
Open from source control repositories like GIT, TFS or SVN

New Project

**Process**
Start with a blank project to design a new automation process.

**Library**
Create reusable components and publish them together as a library. Libraries can be added as dependencies to automation processes.

**Test Automation**
Start with a blank project to create a new test project

**Template**
Create a template that you can use to build automations that have a set of predefined common characteristics.

New from Template

**Background Process**
Create a process that starts in the Background and can run concurrently with other processes for as long as it doesn't use UI interaction.

**Mobile Testing Project**
Create a project for your mobile app automated test cases

**Orchestration Process**
Implement a process through service orchestration and human intervention as well as through long-running transactions.

**Robotic Enterprise Framework**
Create a transactional business process that follows best practices for large scale deployments.

**Transactional Process**
Model a process as a flowchart diagram.

**Trigger Based Attended Automation**
Trigger an automation in response to a mouse or keyboard user event.
